

Musaab Kubbi

Software Engineer | Full-Stack Developer

mkbusiness202@gmail.com | Saudi Arabia | [LinkedIn](#) | [Website](#) | [GitHub](#)

SUMMARY

Software Engineer with 3+ years of experience building production web and mobile applications across frontend, backend, and system architecture. Experienced in developing scalable full-stack systems, REST APIs, databases, real-time services, and business applications using modern JavaScript and TypeScript technologies. Proven ability to deliver end-to-end solutions from architecture and development to deployment and maintenance.

PROJECTS AND EXPERIENCE

Doolab Agency, [Link](#), Remote

Aug 2025 — Present

- Built the company's main website from scratch, handling the full technical architecture, performance, and user experience.
- Designed and developed internal and client-facing systems, including dashboards and full-stack web applications.
- Delivered multiple end-to-end projects, covering system architecture, database design, API development, deployment, and maintenance.
- Architected and led a scalable Turborepo monorepo spanning 5 applications and 6 shared packages, standardizing development workflows and enabling high code reuse and maintainable cross-service architecture.
- Designed and built a layered Express.js and Prisma backend with 40+ REST API route groups, backed by PostgreSQL and Redis.
- Implemented real-time services and notifications using Socket.IO across web and React Native mobile applications.
- Built secure authentication and account workflows using JWT and OAuth integrations with multiple providers.
- **Technologies:** Next.js, React, React Native, Expo, TypeScript, Node.js, Express.js, Prisma, PostgreSQL, Redis, Socket.IO, Supabase, Turborepo, pnpm.

Falcons FORCE Academy Website & Dashboard, Team Falcons, [Link](#), Remote

Jul 2025

- Built the official website and dashboard for Falcons FORCE Academy, a CS2-focused esports academy.
- Integrated the FACEIT API to dynamically display player profiles, rankings, and ELO data.
- Developed responsive and high-performance public pages and authenticated dashboard experiences.
- Achieved 37k+ visits within the first half-month after launch.
- Contributed to frontend architecture, API integration, routing, localization, and overall user experience.
- **Technologies:** React.js, TypeScript, Vite, Tailwind CSS, Redux, Axios, react-i18next, react-router, Sonner.

Green Falcons Website & Dashboard, Team Falcons, [Link](#), Remote

Jun 2025

- Built and launched the official Team Falcons fan platform for the EWC (Esports World Cup), supporting match registrations and digital fan engagement.
- Developed a complete dashboard with user registration, loyalty points, match attendance tracking, and administrative management capabilities.
- Built an admin panel for managing events, users, registrations, attendance records, and loyalty rewards.
- Achieved 6k+ visits, 13k+ page views, and 3k+ registered users during the initial launch period.
- Delivered a responsive, accessible, and high-performance user experience across desktop and mobile devices.
- Collaborated closely with the Team Falcons marketing team to translate campaign requirements into platform features and user flows.
- **Technologies:** React.js, TypeScript, Tailwind CSS, Redux, Axios

Falcons × Fatal Fury Event Website, Team Falcons, [Link](#), Remote

Apr 2025

- Developed and launched a promotional event website for the Team Falcons × Fatal Fury collaboration.
- Built a registration flow for users with pre-ordered copies of the game and managed the end-to-end user journey.
- Handled 100k+ unique visitors without major technical issues, maintaining stable performance during high traffic.
- Delivered a responsive and cross-browser compatible experience across desktop and mobile devices.
- Collaborated with marketing and game teams to translate campaign requirements into website content and registration flows.
- **Technologies:** HTML, Tailwind CSS, JavaScript, Google Sheets

EDUCATION

Samsun University, Samsun, Turkey - Bachelor's Degree, Software Engineering2019 — 2025

Studied software engineering with a focus on software development, artificial intelligence, web applications, databases, computer networks, and cybersecurity.

Gained practical experience through academic projects involving web and mobile development, Git, Docker, and cloud technologies.

CERTIFICATIONS

Advanced React, ManarahJul 2024

SKILLS

- Programming Languages : TypeScript, JavaScript, Python
- Frontend & Mobile : React.js, Next.js, React Native, Expo, Redux, Tailwind CSS, HTML, CSS
- Backend & APIs : Node.js, Express.js, NestJS, REST APIs, Socket.IO
- Databases & Data Skills : PostgreSQL, Redis, Prisma, Supabase, MongoDB
- AI-Assisted Development : Claude, Codex
- Tools & Architecture : Git, Docker, System Architecture, API Design, Authentication, OAuth, Turborepo, pnpm
- Soft Skills : Problem Solving, Effective communication, Teamwork, Time Management, Adaptability, Remote Collaboration
- Languages : Arabic, English, Turkish
